1701 E. Colter St. Unit 154, Phoenix, AZ 85016 ● (602) 738-2558 ● ritchie.prom@gmail.com

Objective

Seeking a junior to mid-level programming position that will continue to expand and challenge my current knowledge of the software development field.

Languages

Proficient knowledge:
C#, JavaScript, HTML5, CSS3

Working knowledge:
SQL, Java

Frameworks & Other:
.NET 4.5, LINQ, MVC, MMVM, ASP.NET, Razor syntax, LESS, Bootstrap, Responsive Design, IndexedDB, Node.JS, Agile Development, TFS, AngularJS, JQuery, JSON, Node.JS, Android SDK, Photoshop, UI/UX Design

Application Experience

- Visual Studio Professional 2013
- LINQPad
- Git & GitHub
- Eclipse IDE/Android Studio
- Microsoft SQL Server Management Studio
- Command Line Interface
- TortoiseSVN

Work Experience

513 Ventures   Mar. 2015 – Current
Front End Developer (Contractor)   Phoenix, AZ

Responsible for redesigning legacy eCommerce websites into a mobile-friendly design. Technologies used included heavy use of Bootstrap, HTML5, CSS3/LESS, JavaScript as well as working with the MVC framework, ASP.NET and Razor syntax.

Recovery Innovations   Mar. 2014 – Mar. 2015
Junior Software Developer   Phoenix, AZ

Working with a small team, we supported existing and produced new software for record-keeping and billing purposes for a non-profit behavioral health company.

Notable tasks include…
- Refactored legacy LINQ code to speed up retrieval and display of data by minutes.
- Designed new method of validating records that greatly sped up the process from many minutes to seconds.
- Helped create a record-keeping web-based application for use on tablets for both online and offline use. Back end was created using C# and .NET while the front end used modern web design including JavaScript, HTML5 and CSS3

Ipro Tech, Inc   Aug. 2013 – Mar. 2014
Tech Support Specialist   Scottsdale, AZ

Provided technical support to customers for our litigation software. The position provided constant exposure to the software development process including working with developers to solve our client's problems.

Use of downtime allowed the creation of case study programs based on the needs of our clients and the limits of our current software release.
